

Hello 5th Graders!

You did a great job with remote learning this year and are now moving up to Grade 5! Your Summer work packets for ELA (Reading and Language Arts), Science, Math and Social Studies are included and are separated by subject.

I am assigning the ELA and Science work; directions for these packets will follow. Mrs. DeLillo has included instructions for the Math packet, and Mrs. Trimm has included instructions for the Social Studies packet. You are required to complete all of the assigned work during the Summer; it should be completed by the first week in September.

- **ELA:** Read the book Shiloh by Phyllis Reynolds Naylor and complete the accompanying packet. Follow the directions given on each sheet in the packet. The questions in the packet are broken down by chapter, so it is a good idea to answer each chapter's questions after you finish reading that chapter. Be sure to answer the written response questions in complete sentences.
- **Science: Space/Solar System**
 - "The Rocky Planets" - read the information and answer the questions that follow. Written response questions should be answered in complete sentences.
 - "The Gas Giant Planets" - read the information and answer the questions that follow. Written response questions should be answered in complete sentences.
 - "Asteroids and Comets" - read the information and answer the questions that follow. Written response questions should be answered in complete sentences.
 - "Seeing the Invisible" about black holes - read the information and answer the questions that follow in complete sentences.
 - "Table of Planets" - Use the table about the planets in our Solar System to answer the questions. You do not have to answer the questions in complete sentences since the lines are short.

Have a great summer!

Mrs. Siegel
