

# TECH ROOTS CODING CLASS

*In a TechRoots Academy Class, students will learn and gain an understanding in how to code their own website. Each week will build upon itself and by the end they will have their own custom coded website that they can take home. Coding and STEM based education teaches children more than science and mathematics concepts. The focus on hands-on learning with real-world applications helps develop a variety of skill sets, including creativity and problem solving. Our main hope and goal is to extend our knowledge in software and coding to the youth, so that they may either develop a passion for computer science or expand their knowledge in technology.*

**FRIDAYS - SEPT 22 - NOV 10 (NO CLASS 10/6)**

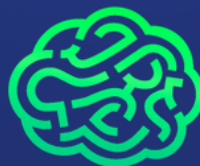

@ Visitation Academy

\$180 per Participant
